

# Pupil Voice: Summer 2023

What do pupils at St Peter and St Paul's think about their Science lessons

Here are some of the words that the children have used to describe their Science lessons:

## **What do you like about Science?**

I like that you can do fun things.

I like exploring new things.

I like using technology.

I enjoy learning about things of the world.

I liked it when we grew cress.

I like investigating things.

It's really interesting.

## **How do you feel in a Science lesson?**

Happy

Amazed

Interested

Confident

Excited

Focused

Like I'm definitely going to learn something new!

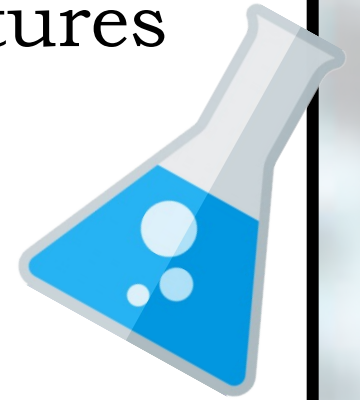

## **What can you do if you are stuck in Science?**

Put my hand up.  
Ask a question.  
Check the LO.  
Move on and try again later.  
Ask my friend.  
Try something new.  
Learn from my mistakes.  
If we are using Chromebooks,  
we can sometimes Google it.  
Try and work it out.

## **What does your teacher do to make science interesting?**

Shows videos and pictures  
Experiments and investigations  
We play games.  
We use toys.  
We sometimes go outside to do Science.  
Takes us on Science trips  
Makes the lessons really fun and enjoyable

## **What is a Science Investigation?**

When you have a question or an idea and you want to test it out.

When you do a fair test.

When you look at something and notice how it changes.

When you have to measure something and see how it grows or changes or things like that.

When you have an idea but you need to get evidence to understand it.

When somebody tests something out so that they can understand it better.
